Hi Sirius,

I'd just like to express my appreciation for your work as a teaching assistant for MFE1. It's not always easy to engage a class in discussion, but your fun personality and expertise in mathematics fostered active participants in every recitation. They say one learns best when they actively partake in a task, and I think your recitations were a clear demonstration of this. In fact, your recitation sections were undoubtedly my favorite part of this course. I am glad I didn't hurriedly take the MFE1 placement exam to skip this course. Once again, it has been a pleasure having you as TA, and I wish you happy holidays!

Sincerely,

David [REDACTED]

Section Leader Comments

Describe the one best thing about the lab section or the instructor that was effective in helping you learn. If you could suggest one thing to improve the section, what would it be?

- The R in this course was hard to come by and harder still to grasp. I think if the TA had more time to

go over the R code, the labs would be easier to do.

- There was already a box for me to write about Sirius, but to repeat myself he is great
- I really appreciated the TA's R code in the R notebook format as it was very useful and much more helpful than the R code given in the homework assignments.
- Same thing I addressed before-- instructor very accessible over email and in office hours was very useful
- I think that Sirius tries very hard to help us with this material and is fair in all aspects. He always knows the answer to any questions we have and explains them in a simpler way that sometimes the professor fails to do.
- Really enjoyed the structure of and interaction in the recitations, in addition to the instructor being very accessible and open to questions

Instructor Comments

Use this space to provide additional feedback to your instructor. The comments will be used by faculty for potential improvement.

- There isn't much feedback since the instructor did his job.

- I like that you taught us skills for Calculus and skills to pass the exam.

- He was nice and considerate
- He was very nice and knew what he was talking about. I don't think he went over topics that were directly relevant to the chapter but he was useful.
- This instructor also showed a good knowledge of the subject, but I wish that we could have focused on more questions and practice of the lessons so that we can have more practice.
- None
- Sirius knows math inside out and broke down topics to a conceptual level using tactics like intuition and critical thinking. He was very approachable and easy to talk to. He used basic math knowledge to lead into more complicated topics and definitely helped me understand the material. There's the surface level math where you just have some understanding and spit back what you learned, but Sirius gave us a rounded and satisfying view of the subject and I'm very grateful for him.
- Sirius helped me gain a deeper understanding of what we learned in class.
- Sirius was a great TA but sometimes the material didn't seem of equivalent difficulty to what we are doing in lecture.
- The class was not extremely challenging but it was challenging enough that it made me learn something and improve my many lacking skills.
- Good TA. Answered a few of my questions outside of class.

- Sirius Baladi encouraged an important aspect of Calculus; logic and understanding beyond simple theorems and formulas that had to be remembered. His instruction complemented Professor Amakoe G.E.D. Gbedemah's lecture very well in a way that promoted learning.
- I really liked how near the end of the semester there were PowerPoints of reviewing the specific topic. It would be better if there were also Slideshows/PowerPoints near the beginning of the semester to review the topics.
